

Shanaya Deboo (MBA'02) shared an opportunity for HBSWANY members to get involved in venture-stage healthcare companies

ELabNYC, now in its 5th year, is a free NYC-focused competitive-entry 6-month training and networking program to help committed entrepreneurs build emerging biotech and health tech ventures.

"We are currently seeking experienced professionals in the Life Sciences/Healthcare space (therapeutics, diagnostics, biotech/biopharma, medical devices/medtech, IT, and research materials/tools) to join the team to be trained to coach the fifth cycle of ELabNYC entrepreneurs in 2017 starting immediately through June 2017. Prior start-up/development stage company experience is required.

ELabNYC (www.elabnyc.com) now in its fifth year, is a free, NYC-focused competitive-entry 6-month training and networking program to help committed entrepreneurs build emerging biotech and health tech ventures. The participants include graduate students of science and business, post-docs, early career researchers, and engineers and physicians.

ELabNYC assists emerging biotech and health technology entrepreneurs evolve their science or technology into a viable company. ELabNYC incorporates an intensive and practical curriculum with hands-on one-on-one coaching, mentoring with experienced founders, and meaningful access to industry experts, entrepreneurs, and investors in the NYC life sciences eco-system.

Our alumni have made critical networking connections through the program. These opportunities have helped spur important changes to their development and business plans, and have led to successes in securing government funding, foundation grants, and private investment.
